4. Assemble the tree from the bottom to the top. Start with the bottom section and insert it into the assembled stand. Make sure the pole is firmly inserted and secured into the stand.
5. Continue by inserting the upper tree section(s) to the lower section(s) until inserting the tree top.
6. Allow branches to fall into place or gently pull up and out. When adjusting branches, be sure that all wires are free of branch hinges.

2. Disassemble the tree from the top to the bottom. Start with the tree top and gently lift straight up to remove from section below and fold all branches toward the pole.
3. In case of difficulty separating the tree pole (trunk), apply a small amount of lubricant at the joint and rotate the upper pole in both directions. Lift up the upper pole again.
