5. Continue by inserting the upper tree section(s) to the lower section(s) until inserting the tree top.
6. Allow branches to fall into place or gently pull up and out. When adjusting branches, be sure that all wires are free of branch hinges.
7. Connect the light strings as per the color labels indicated in **Fig. B** and insert green label adapter into the wall outlet, your entire tree should now be lit.

STORAGE INSTRUCTIONS

1. Remove all ornaments and decorations. For pre-lit trees, first unplug adapter from the wall outlet and then disconnect light extension cord between each section of the tree.
2. Disassemble the tree from the top to the bottom. Start with the tree top and gently lift straight up to remove from section below and fold all branches toward the pole.
3. In case of difficulty separating the tree pole (trunk), apply a small amount of lubricant at the joint and rotate the upper pole in both directions. Lift up the upper pole again.
4. Continue by gently lifting straight up each section(s) from the section below and fold all branches toward the pole until the bottom section is removed from the tree stand.
5. Carefully place all tree sections into shipping box and tape it shut.
